

NAIRA MEHJABIN

Full-Stack Web Developer & Frontend Designer

Rajshahi, Bangladesh | nairamehjabin2014@gmail.com | [GitHub](#) | [LinkedIn](#) | [Fiverr](#)

TECHNICAL SKILLS

- **Languages & Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend & Mobile:** React, Next.js (App Router), Tailwind CSS, Framer Motion, Vite, React Native, Expo
- **Backend & Databases:** Node.js, Express.js, MySQL, PostgreSQL, MongoDB, REST APIs, JWT Auth
- **Tools & Platforms:** Git, GitHub, Vercel, Netlify, Figma, Postman, Prisma ORM

WORK EXPERIENCE

Frontend Designer | Shobdotori.com (*Remote*) • 2026 – Present

- Build responsive UI components using React, Next.js, and Tailwind CSS.
- Collaborate with backend APIs to ensure efficient image optimization, smooth data loading, and fast render speeds.
- Conduct UI/UX performance audits to fix accessibility bottlenecks and optimize mobile responsiveness.

Freelance Full-Stack Developer | Fiverr & Independent Clients (*Remote*) • 2024 – Present

- Converted Figma designs and wireframes into clean, accessible, high-performance React/Next.js web apps.
- Built scalable Node.js/Express REST APIs backed by MySQL and PostgreSQL database architectures.

EDUCATION

Secondary Education (Class 7)

> Active studies alongside self-directed software development practice.

KEY PROJECTS

Chitrabeethi – Full-Stack Online Art Gallery Platform

- **Tech:** Next.js, TypeScript, Tailwind CSS, Node.js | **Links:** [Live Demo](#) | [Frontend GitHub](#) | [Backend GitHub](#)
- Engineered a decoupled full-stack gallery platform supporting dynamic artwork exhibits and client inquiries.
- Built a dynamic image optimization pipeline and decoupled API auth state to serve high-res art without latency.

Cinnabloom Bakery – Dynamic Order & Inventory System

- **Tech:** Next.js, TypeScript, Tailwind CSS, MySQL | **Links:** [Live Demo](#) | [Frontend GitHub](#) | [Backend GitHub](#)
- Developed a bakery storefront with live product listings, order processing, and MySQL inventory tracking.
- Designed atomic MySQL transaction handlers to prevent order state mismatch during rapid item additions.

The Dum Pot – E-Commerce Order Management App

- **Tech:** Next.js, Framer Motion, Tailwind CSS, Lucide Icons | **Links:** [Live Demo](#) | [GitHub](#)
- Architected a food ordering web app featuring custom item modifiers (spiciness levels, portions, extra add-ons).
- Built persistent client-side local storage cart logic to keep state synchronized across browser refreshes.
